Availability: January - May 2026

EDUCATION

Northeastern University | Boston, MA

Sep. 2022 – May 2026

Bachelor of Science in Computer Science | GPA: 3.97/4.0

Coursework: Software Development, Algorithms, Object-Oriented Design, Database Design

EXPERIENCE

[Capital One](#) | McLean, VA

Jun. 2025 – Present

Software Engineering Intern

[EnergySage](#) | Boston, MA

Jan. 2025 – May 2025

Software Engineering Intern

- Optimized AWS API Gateway endpoint by replacing synchronous DynamoDB calls with asynchronous calls using asyncio and aioboto3, reducing response time by 30%; verified performance gains using Datadog traces
- Built an AWS Lambda function triggered weekly with EventBridge to cross-check supplier UUIDs between DynamoDB and NetSuite, sending email alerts using Amazon SNS for detected mismatches to prevent invoicing issues
- Developed a fake review detection system leveraging custom heuristics (duplicate IPs, temporal clustering, geolocation mismatches) and Amazon Comprehend NLP to flag potentially fake reviews, triggering Slack alerts for manual review
- Served as Scrum Master for the team, facilitating standups, retrospectives, and backlog refinement; coordinated with PM to prioritize tickets, led ticket point estimation, and supported teammates in task selection and unblocking work

[TensorDock](#) | Boston, MA

Jul. 2023 – Sep. 2024

Support & Operations Lead

- Led day-to-day communications between customers and developers, ensuring feedback was integrated into the product
- Developed Slack integrations with server monitoring software, reducing server issue resolution time by 90%
- Implemented Python auditing software that validated data consistency between the SQL database and over 200 servers

Product Manager of Core Cloud

Jun. 2022 – Jul. 2023

- Created Python script to optimize database efficiency by removing 40k redundant records
- Coded new feature which allows injection of cloud-init scripts at deployment, boosting customer workflow efficiency

Director of Engineering

Oct. 2021 – Jun. 2022

- Engineered a Bootstrap HTML web dashboard for deploying and managing GPU servers
- Built an API with documentation for modifying server resources, enhancing server flexibility and user control
- Developed a feature enabling customers to create custom balance alerts, ensuring transparency for billing

[Northeastern University](#) | Boston, MA

Sep. 2023 – Dec. 2023

Teaching Assistant for CS 2500 Fundamentals of Computer Science I

- Assisted 30 students in weekly lab sessions, focusing on fundamental CS concepts such as recursion and graph traversal
- Facilitated faculty in grading student assignments, leaving constructive feedback to foster strong coding practices
- Held weekly office hours to mentor students, providing personalized support on homework and classroom concepts

PROJECTS

[SearchNEU](#) | *React, TypeScript, SCSS, Twilio*

Jan. 2025 – Present

- Search engine used by thousands of students to find classes and receive text alerts when seats open up
- Created mobile React components to improve user experience by simplifying desktop designs and enlarging touch targets
- Added Twilio STOPALL text reply functionality to let users unsubscribe from seat notifications

[Bujava](#) | *Java, JUnit, JavaFX*

May 2023 – Jun. 2023

- Developed a bullet journal application with task queues, statistics tracking, and event management
- Adhered to SOLID object-oriented design principles, ensuring that the code is scalable and maintainable
- Constructed comprehensive test suites using JUnit to verify the application's functionality and to identify potential issues

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, C++, C, JavaScript, HTML

Frameworks: React, Django, Material UI, Express, NodeJS, Flask, Bootstrap, Pytest, JUnit

Cloud Services: AWS (Lambda, API Gateway, CloudWatch), Datadog

Databases: PostgreSQL, DynamoDB, MySQL, MongoDB
